## GARDENING TIPS BY COLEMAN OUTDOORS

First Tip: You can't but smile when you pull into a driveway and see a bed of sunny yellow reblooming day lillies, such as "Happy Returns" or "Buttered Popcorn". Mix them with blue Agapanthus or Lily of the Nile for a early Summer accent. Remember to clip Day Lillies back around mid-Summer to spur new growth.

Second Tip: When fertilizing trees, follow these easy feeding steps:

Step 1: Bore 6" to 12" deep holes under the tree's canopy using a heavy duty auger attached to an electric drill. (Auger can be found at Lowe's or Home Depot) Start 1' from trunk and continue several feet past tree's canopy. Space drill holes 12" to 18" apart.

Step 2: Fill each hole with an organic granular fertilizer such as Milorganite. Be sure to *only* use organic fertilizer, otherwise you can burn the tree's roots. Water thoroughly afterwards. Call Jeff for any of your landscape needs.
